

## **Testimonials for Wheatgrass + Ocean Solution**

Dear Enquirers,

I am a stockholder in OceanGrown, LLC. I have always been impressed when testimonials came from top business executives and especially when they came from owners and senior management. They usually come across as sincere and genuine to me. It is in that spirit that I offer my own experiences with OceanGrown's wheatgrass products.

For the last twenty odd years I have been on the hunt for the essential health factors, factors that in no nonsense ways actually affect health unequivocally. Don Jansen, OceanGrown's founder and I met in the spring of 2000, we talked late into the night about health, life, religion, food, farming, and many other subjects including "Sea Energy Agriculture." After I returned home we continued the dialogue. Don would send OceanGrown wheatgrass to Connecticut, my home at the time, and so the journey began.

I've been drinking wheatgrass juice ever since (sometimes we run out), and these are the results so far.

- Lost twenty pounds (198 to 178, the same weight as when I graduated high school) without effort or change in exercise habits. Simply the cravings went away and I never felt hungry anymore.
- From the age of eleven have suffered from a nail fungus that evidently is resident on most of the population, who have, fortunately enough immunity to keep at bay. Consequently had no toe nails from the age of 11 to 48. Now at 51 I have them, better late then never! Totally unexpected result.
- This ones more subtle but none the less appreciated, I need much less sleep and now feel rested and ready to go at the crack of dawn and can work late into the night

Dr. Murray and Don Jansen have always said that if you get all the proper minerals in organic form in your diet your immune system would be able to fight off anything. I'm a believer, especially since I felt in good health three and a half years ago, before all these things happened.

I hope you decide to give it a go. I did and joined the company.

Sincerely,

President, OceanGrown, LLC

### **Our personal experiences with wheatgrass juice**

We have been consuming wheatgrass juice (1-2 ounces per day) for about 8 weeks now. Energy levels are soaring and we are experiencing reduced sleep requirements. Digestion and elimination systems are functioning increasingly well. In fact, I personally have never felt cleaner on the "inside" my whole life, which is saying considerable as I do colon cleanses at least twice per year. My wife isn't a fruit and vegetable person, in fact, in her words, she doesn't do "green foods". I felt that this would be the ultimate test – she loves wheatgrass juice! She now craves greens instead of sugar, and she has eliminated caffeine from her diet completely. It has boosted her metabolism and her energy level. I have almost completely eliminated the "dead" forms of nutritional supplements in my routine, and am experiencing more vitality, energy and stamina than ever before. I have shed the "extra winter layer" already and its not even Spring yet. Gum tissue in one area of my mouth that has been worn down from my over-aggressive brushing style has been almost completely regenerated – no more bleeding from flossing! I also had a wonderful result from the juice after burning the roof of my mouth on some hot food at dinner one evening. The next morning, that area was inflamed and tender, as I'm sure we have all experienced. I took a sip of wheatgrass juice and

held it with my tongue to the injured area for five minutes. The inflammation and tenderness had almost completely vanished by the time I swallowed the juice!

I know that wheatgrass juice and other raw, living foods will become mainstays in the human diet in the future. My research has shown that in Europe and many other overseas countries, the demand for these foods is growing exponentially, and it is now moving to the United States. One overseas company has developed a totally self-contained, climate-controlled system for growing hydroponic wheatgrass and sprouts. This technology is environmentally friendly and can produce vast quantities of fresh, organic, raw living foods in very little space. I predict that juice bars will be one of the fastest growing business segments in America within the next decade.

The very best part is that raw living foods – wheatgrass, sprouts and baby greens, can be, and should be, produced in the home – with a minimum of cost and effort. We are working with these methods and are able to teach others to do the same. For those not interested in growing their own, we can do it for you. I truly feel that wheatgrass juice is life-changing nutrition for the 21<sup>st</sup> Century.

Eric Rentz – an American doctor, and supporter of Ocean Grown LLC, had a patient with a cancerous lump, in his scrotum, the size of a 'football'. Hospital doctors gave him a week to live – they said they could do no more. They had already spent a fortune on his treatment to that point. He switched to a Wheatgrass program, with a little food grade Hydrogen Peroxide. It seemed that there was nothing left to lose, and others had had significant success with wheatgrass in such circumstances in the past. To be using the wheatgrass grown with all the elements seemed to give the patient an ever greater reason to be optimistic. Within one week he was able to sit up, and within two he climbed out of bed. Within 6 weeks the lump was shriveling up. 6 months later and he was given the all-clear and was back to 'normal'. Now he is planning a new business selling OceanSolution grown wheatgrass in Miami!!

July 2004

---

This testimonial comes from one of Kevin Keune's customers in Wisconsin.

The client is a 50-year old man. He had been admitted to hospital for a hernia operation. Standard hospital practice is to undertake a pre-operation test for oxygen levels in the patient's blood, to ensure they are fit to face the anesthetic.

This patient had been consuming about 2 ounces of Kevin's wheatgrass juice for the previous three weeks.

When the nurse checked the results she saw one she had never seen before – 100%!!

---

Don Jansen's father was in ailing health in his late 80's. Don switched him to 8 ounces of wheatgrass juice per day, which Don was growing with his Ocean Solution. To consume this much meant that he would need to split it into 8 servings to ensure even absorption. At the start he was grey haired – what was left – and had failing sight. After a short while his hair

began to blacken, his sight returned to normal. He threw away his glasses and was given back his drivers licence. His skin was also rejuvenated, taking on a youthful appearance, becoming much less wrinkled and flaky. For many ears prior to beginning this dietary change, Jansen snr. had experienced a succession of toxicity induced tumours, but in the years on the wheatgrass regime, he saw these wither and he eventually became tumour-free.
